

- ★ The Comet is the one of the most active two person boat in the mid Atlantic States.
- ★ There are active fleets in Maryland, New Jersey, Pennsylvania, Ohio and Bermuda.
- ★ Each Summer there are many regional regattas as well as the North American and International Championships. The Comet is also the only two person boat raced in Bermuda Race Week.
- ★ Comets are higher performance than the collegiate 420 and FJ, yet do not require the skill level that a trapeze or spinnaker boat would require. This means it is much easier to train a newcomer to the sport.
- ★ This 82 year old classic sailboat has a new builder who has refined the self-rescuing hull with improved ergonomics that will appeal to sailors of all ages and levels of experience. It is now stiffer and safer than ever before with a self bailing double bottom and side tanks.
- ★ Mylar and Dacron sails with a loose footed mainsail and/or a transverse top batten are now Class approved.

- ★ Comets may have simple three-stay rigs and controls or a full range of rigging and sail adjustments to satisfy the most discerning racer.
- ★ The hard chine design is forgiving and the 260 pound hull can plane in as little as 12 knots of wind.
- ★ Newer fiberglass and older wood Comets are equally competitive.

- ★ The Comet exemplifies competitive sailing at its best with mentoring of new members by sharing strategy, tactics and adjustments. Fabulous regatta venues provide excitement, and fun. Any Comet sailor can attest to the great design of this boat and how open and friendly the class members are. There is no better recommendation for buying a new or previously owned Comet for competition and for fun.
